Stafford Raises USD160m Co-investment Fund to Secure Major Secondary Opportunity

Stafford Timberland today announced that it had successfully closed a USD 160m co-investment fund. The fund has invested alongside Stafford Funds V and VI in a recently completed secondary acquisition.

The investment, subject to confidentiality restrictions, is the largest yet completed by Stafford.

Secondary acquisitions provide investors with immediate exposure to assets under management. They are an important part of Stafford's strategy of providing its investors with a globally diversified portfolio of timberland assets across major forestry economies.
